

DEALER BULLETIN

June 4, 2010

BULLETIN NO.: 400/200S-110

TO: ALL ANDERSEN DISTRIBUTORS, & DEALERS

SUBJECT: Andersen® 400 Series Straight Arm Casement Operator Enhancement

EFFECTIVE: June 1, 2010

Description:

In a continuing effort to improve our products, Andersen is pleased to announce an enhancement to the 400 Series casement straight arm operators. Andersen will now offer the High Corrosion Resistant (HCR) operator as the standard operator. The difference between the HCR and Standard operator is the HCR operator has a painted operator rivet and the standard has a stainless steel rivet. Below you will find the saleable part numbers as well as an image to highlight the subtle visual change of the painted operator rivet. Please note that the standard saleable numbers (1361485 & 1361486) will be discontinued.

This improvement will be handled as a running change. The List price for the HCR operator will be the same as the current Standard operator at £16.77.

Description	Saleable #
Left Hand Straight Arm Operator HCR	1361483
Right Hand Straight Arm Operator HCR	1361482
