DEALER BULLETIN

Date; 2nd June 2010
BULLETIN No; BMW-1010
SUBJECT; IQ UPDATE TO VERSION 10.1
EFFECTIVE; IMMEDIATE

BULLETIN DETAILS

All Dealers will shortly be receiving in the post the latest update for the intelligent Quote (iQ) software – release version 10.1. *(This single disc can be used for upgrading more than one PC).*

Please ensure that you have already carried out the upgrade from 9.2 to 10.0 before installing this disc.

Once you have installed the update version 10.1, please remember that ALL the quotes you have within your system, including those archived, will need to be updated. This is done by selecting the update tag and updating all current and archived projects. In doing this, any changes made to products between each version of IQ will be highlighted in red, which will require you to select and update each line affected within each quote. To keep this to a minimum, it may be prudent to check and delete all those quotes that are no longer active prior to installing version 10.1

As with previous updates, it is important that you update ALL your quotes, to ensure they are current and acceptable for ordering at a later date.
