

DEALER BULLETIN

May 31, 2010

BULLETIN NO.: PSW-210
TO: ANDERSEN DISTRIBUTORS AND DEALERS
SUBJECT: CUSTOM CASEMENT ENHANCEMENTS
EFFECTIVE: 1st June, 2010

OVERVIEW

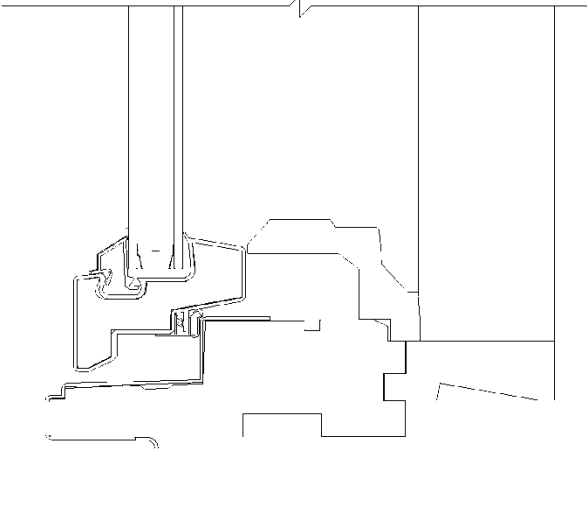

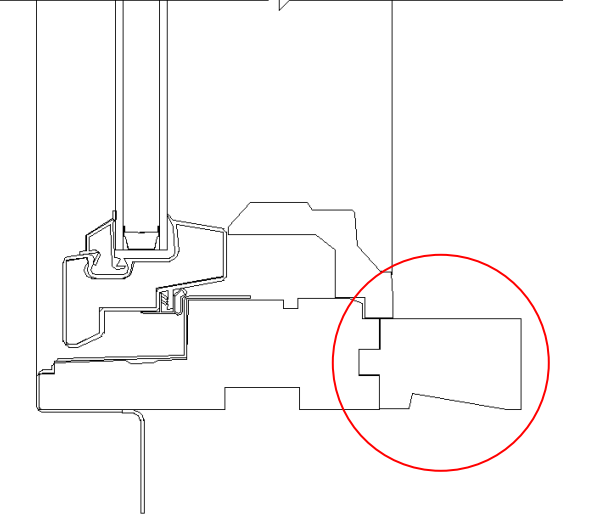

Andersen is pleased to announce several enhancements for the custom casement product line with intelligent Quote (iQ) software version 10.1 release, to be released shortly. They are the following:

- The lead time for custom sized casement, awning, transom, and picture windows will be changing from Category 4 to category 3 effective May 24, 2010.
- A thick replacement extension jamb solution has been developed to better meet the needs of custom casement replacement applications including greater flexibility for window trim placement. This new product offering will be available in 12 foot lengths for Clear Pine, White - Vinyl Wrapped, and White - Painted units. Please see Table 1 on the following page for the available part numbers, size, description, and base pricing. A cross sectional view that illustrates the differences between our standard extension jamb and the New “Thick Replacement Extension Jamb” can be viewed in Table 2 on the following page. The thick replacement extension jamb can be quoted in our iQ software tool by using the part numbers available in this dealer bulletin (Page 2/Table 1).
- Custom size casements, awnings, transoms, and picture windows, are now available in standard widths and heights for single units ending in 1/16” (3mm) increments. This offering will enable more options for joining standard products with custom products. Please see units size tables on pages 3 (casement unit size Table 3), 4 (awning unit size Table 4), and 5 (picture window unit size Table 5) of this dealer bulletin. Please reference dealer bulletin PSW-309 for a more comprehensive understanding of the custom casement sizing capability, pricing, accessories, etc.
